

## Homework #1

This assignment will confirm that you know how to install python packages and that your environment is setup correctly.

```
In [ ]: 1 import sys
        2 print("Python version: {}".format(sys.version))

In [ ]: 1 import pandas as pd
        2 print("pandas version: {}".format(pd.__version__)) # __ are two underscores

In [ ]: 1 import matplotlib
        2 print("matplotlib version: {}".format(matplotlib.__version__)) # __ are two underscores

In [ ]: 1 import numpy as np
        2 print("numpy version: {}".format(np.__version__)) # __ are two underscores

In [ ]: 1 import scipy as sp
        2 print("scipy version: {}".format(sp.__version__)) # __ are two underscores

In [ ]: 1 import IPython
        2 print("IPython version: {}".format(IPython.__version__)) # __ are two underscores

In [ ]: 1 import sklearn
        2 print("scikit-learn version: {}".format(sklearn.__version__)) # __ are two underscores

In [ ]: 1
```
